DETAILED ACTION

The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 2616.

Response to Arguments

1. Applicant's arguments with respect to amended claims 13-14, 16-18, have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 13-14, 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over **Schein et al.** (US 6,388,714) in view of **Boyer et al.** (WO 98/26584).

Claims 13-14 and 16-18 the examiner incorporates by reference the last action against the claims, wherein the claims have been amended to further recite, wherein Schein fails to disclose,

- receiving the data (EPG) from the broadcasting station, (the IP address of Schein), being a homepage address of the broadcasting station.

Boyer teaches in Fig. 3, a broadcasting station (88, "WEB Server & Cable System Head end") or a combined broadcaster having a WEB server of and being also, a cable system head-end, therefore, a broadcaster or head-end with WEB server, accessed thru an address (IP/URL), to access an EPG, or electronic program guide data thru the internet or Web server, page 13-14, "Internet television program guide system is shown in Fig. 3" and "A Web server 86 is provided on each cable system head-end 88. ... 88 has .. components for distributing cable television signals to customers in the service are surrounding head end 88", as taught by Boyer.

Art Unit: 2621

Therefore, it would have been obvious to those skilled in the art to modify Schein by providing a Web server in each cable system head end, as taught by Boyer, as is obvious to provide a broadcasting station or Cable Head end with its own Web server, thereby being a home page of the broadcaster, thereby the guide data would be associated with the broadcasting of television programming, provided by the broadcaster, as is deemed obvious in view of Boyer.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
